-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on _____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-28 is/are pending in the application.
4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1-23 is/are allowed.

DETAILED ACTION

This Office Action is in response to the Applicant's application filed September 30, 2003.

Information Disclosure Statement

The information disclosure statement filed March 17, 2005 fails to comply with 37 CFR 1.98(a)(1), which requires the following: (1) a list of all patents, publications, applications, or other information submitted for consideration by the Office; (2) U.S. patents and U.S. patent application publications listed in a section separately from citations of other documents; (3) the application number of the application in which the information disclosure statement is being submitted on each page of the list; (4) a column that provides a blank space next to each document to be considered, for the examiner's initials; and (5) a heading that clearly indicates that the list is an information disclosure statement. The information disclosure statement has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 24 is rejected under 35 U.S.C. 102(b) as being anticipated by Lawrence et al. (3,566,669).

Lawrence et al. discloses an inspection system (Col. 1 lines 23-34 and Fig. 1) for reconstructing an internal surface geometry of a part, the inspection system comprising: at least one artifact 24 having a known geometry and a plurality of known dimensions (elements 28 to 32); at least one fixture 15 arrangement for positioning said at least one artifact relative to the part; and an imager 38 for obtaining a plurality of thickness data of the part and the artifact.

Response to Submissions

In recognition of the references under X category of the European Search Report, examiner has considered them and found that none teach or suggest generating a plurality of internal surface data using the thickness map and the external surface data. Therefore, the references cited in European Search Report could not be used against the claims.

Allowable Subject Matter

Claims 25-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach or suggest an external surface data monitor or a lamp for irradiating the artifact and the part.

Claims 1-23 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach or suggest registering a thickness map with a plurality of external surface data for the part and using it to generate a plurality of internal surface data.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mueller et al. (US 2005/0180623) discloses a plurality of images are taken from a plurality of relative angles with respect to the object, and the plurality of images depict a plurality of surface portions of the object but lacks a plurality of internal surface data generated. Cable et al. (US 2005/0028482) discloses a method for obtaining multiple representation of an internal portion of an object and a second imaging system but does not suggest infrared thermography. Barstow (US 2003/0113006) discloses the capture of visible light images in correspondence with radiographic images, the visible surface structure of a subject can be reconstructed and registered with the corresponding internal structure of the subject.
